SEUT Type A/B

## (2) Research Objectives and Content Inclusion of charts and diagrams is allowed. Please describe clearly. Please describe research objectives, methods, and topics. Clearly specify what your plan is, how you will execute your plan, and how far your research will go. If the project is a joint research project, please clarify your specific role. If the research you will be engaging in during the research plan period will be conducted at another location or university, please describe the situation.

Name of Applicant	

(3) Research Characteristics and Distinguishing Features	3
Please describe the following items:	
① Prior research to date as compared with research conducted in t	he planned study.
② The significance of the research in relation to relevant national Impacts and future prospects expected upon completion of this s	
impacts and ruture prospects expected upon completion of this s	nuuy.
(4) Yearly plan	
Please indicate plans for each year, regardless of whether or not the p	slan for each year fits the elletment for the original disburgement
	nan for each year his the anothient for the original disoursement.
(First year doctoral)	
(Second year doctoral)	
(Second year doctorar)	
(Third year doctoral))	
(Tillid year doctorar))

Below, please indicate only those parts of the project to which the applicant played a central role. In these cases, include the serial number, and indicate "none" where items are not applicable. Underline the applicant. If it is impossible to fully explain the major contributions of the applicant in the space provided, summarize the main points, and at the end of each point, indicate with text such as "refer to other information," etc.

(1) Theses and papers published in journals (including bulletins and collections of papers)

Please note the existence of peer reviewed publications. In cases where peer reviewed publications are available, please limit to those which have been printed or transcribed already. Documents under review or currently printing are excluded.)

- ① Author (including the name of the applicant, enter the full name of each individual who participated in the production of the published document in the same order as appears on the published work), title, journal name, publishing office, issue number, starting and ending page numbers, year of publication, and author affiliation. Information regarding work should be included in the footnotes.
- ② Please attach publications that have already been recorded after page 7 as proof of publication.
- (2) Articles and commentary published in commercial magazines or journals
- (3) Presentations at international conferences

Please note the type of appearance (oral, poster, etc.) and whether or not the presentation was peer reviewed.

Author (including the name of the applicant, enter the full name of each individual who participated in the production of the published document in the same order as appears on the published work), title, name of society where presentation was given, presentation/thesis number, location, month and year. Mark the presenter(s) with a circle. Presentations to be given are excluded, however, explanations of presentations that have been accepted are allowed. In these cases, please attach proof of acceptance after page 7.

(4) Domestic Conferences and Symposium Presentations

Indicate in the same style as #3. In cases where you would like to describe submissions that have been accepted for presentation, please attach proof where applicable in the same fashion as #3.

(5) Patents, etc.

Describe those currently in application,	available to the public, and other	ers. If you cannot provide	e details for an applicat	ion currently in progress,
provide an outline only.				

(6) Other (Awards, etc.)				

Name of Applicant

The applicant should fill in each of the following items for self evaluation.  Research positions, motivation for applying to engineering-related positions, aim as researcher, engineering forward progress strengths, etc.  Particularly important points from the above self-evaluation (exceptional academic performance, awards, admission grade skipping study abroad experience, distinctive extra curricular and intramural activities). Activities related to (or similar to) GCOE activities are also acceptable.
